For installation, operation and maintenance information and instructions, please refer to the applicable MrSteam Installation, Operation & Maintenance Manual[s]. Installation Instructions, Installation & Operation Instructions and/or Technical Specifications are included with the product, and can also be found at mrsteam.com. Failure to install any MrSteam product according to the applicable installation manual may result in property damage or an inoperable or hazardous condition. See product packaging and labeling for additional important information.

The products referenced in this Price Book are for residential applications only. Installation of residential products in non-residential or commercial settings (e.g., hotels, spas, gyms, etc.) may result in property damage or an inoperable or hazardous condition. Residential steam products require professional installation by licensed and qualified plumbers and/or electricians. For safety and convenience consult a professional contractor or trade person in specifying the appropriate products.

The Intelligent Steambath®
E-Series Generators

MrSteam generators are crafted from recyclable stainless steel and assembled with meticulous attention to detail. Designed, engineered, and assembled in Long Island City, NY to the most exacting standards, our generators are clean, virtually silent, and ultra-efficient.

All MrSteam residential steambath MS Generators installed in the United States or Canada qualify for a limited lifetime warranty. For full warranty details, please visit: https://blog.mrsteam.com/wr
MrSteam MS Generators

Limited Lifetime Warranty
Free from defects in materials and craftsmanship for its lifetime. MrSteam will repair or replace (at its option) a Generator which fails to conform to this warranty.

Install Up To 60 Feet Away
Install in areas such as a cabinet, closet, under a sealed bench, or in an insulated attic.

Steam IQ
Exclusive microprocessor operating system is the brains of our intelligent steam generator.

Plug & Play Steam Shower Accessories
Easily install spa therapy accessories or components such as AromaTherapy, ChromaTherapy, SteamLinx, and more.

Self-Diagnostics
LED indicators to help you troubleshoot any connection and maintenance challenges.

Built With Surgical Stainless Steel
Naturally corrosion resistant, 100 percent recyclable stainless steel.

Easy On The Environment
Designed to save water and energy. Uses less than two gallons of water compared to 40 gallons for an ordinary bath.

Safety First
75 minute automatic cutoff, low voltage board, designed for easy access, and safe service.

Unmatched Quality and Certified for Safety
High quality construction. UL listed in the US and Canada and CE and NOM certified for unsurpassed safety.

Industrial Heating Element
Reliable, industrial grade, and the industry’s largest copper heating element, heats fast, and is easy to remove and service.

One Platform
All MS Generators work with all MrSteam Controls and with the SteamLinx Mobile App.

Whisper Quiet
Our water solenoid technology ensures that the generator is whisper-quiet and never hammers or hums.

Small Footprint
Compact, easy to install, and about the size of a large briefcase. Requires zero clearance, so it can be placed flush against the wall.

AutoSteam Water Control
Our automatic water control maintains constant steam by introducing just the right amount of water through a proprietary dispersal chamber.
The Bathroom. Reimagined.
Generator SmartSizing Calculator

To begin building your MrSteam system, use the Generator SmartSizing Calculator below to determine the steam generator needed to deliver the right amount of steam for your space.

1. Measure the length, width, and height of the steam enclosure (in feet):
   Multiply the Length _______ x Width _______ x Height _______ = Room Volume _______

2. Construction Materials:
   Natural marble, stone, shale, glass block, or concrete: Add 110% _______
   Ceramic, porcelain, or glass tile on cement board or mortar bed: Add 40% _______
   Ceilings above 8 ft. (15% per foot, max 10 ft.): Add 15% _______
   For fiberglass and acrylic: Deduct 15% _______

3. Add all figures to obtain the Total Adjusted Volume required:
   Room Volume _______ + Construction Materials _______ = Total Adjusted Volume _______

4. Use the total adjusted volume calculation and compare to the specifications chart on the following page (page 9) to select the appropriate generator model for your installation.
